INDEX FOR VOLUME 28

Anderson, T. W. The use of factor analysis in the statistical analysis of multiple time series. 1-26.

Baehr, Melany E. A comparison of graphic and analytic solutions for both oblique and orthogonal simple structures for factors of employee morale. 199-210.

Cattell, Raymond B. (with R. L. Gorsuch). The uniqueness and significance of simple structure demonstrated by contrasting organic "nature structure" and "random structure" data. 55-68.

Cronholm, James N. A general method of obtaining exact sampling probabilities of the Shannon-Wiener measure of information. 405-414.

Davis, James H. The preliminary analysis of emergent social structure in groups. 189-198.

Ekman, Gösta. A direct method for multidimensional ratio scaling. 33-42.

Fagot, Robert F. On the psychophysical law and estimation procedures in psychophysical scaling. 145-160.

Feldman, Solomon E. (with E. Klinger). Short cut calculation of the Fisher-Yates "exact test." 289-292.

Feldt, Leonard S. Note on use of extreme criterion groups in item discrimination analysis. 97-104.

Gibson, W. A. Factoring the circumplex. 87-92.

Gibson, W. A. On the symmetric treatment of an asymmetric approach to factor analysis. 423-426.

Gorsuch, Richard L. (with R. B. Cattell). The uniqueness and significance of simple structure demonstrated by contrasting organic "natural structure" and "random structure" data. 55-68.

Greenberg, Marshall G. *J* scale models for preference behavior. 265-272.

Gregson, R. A. M. Some possible forms of lexicographic evaluation. 173-184.

Hazewinkel, Aart. A note concerning the Creager-Valentine paper. 105-108.

Heermann, Emil F. Univocal or orthogonal estimators of orthogonal factors. 161-172.

Henrysson, Sten. Correction of item-total correlations in item analysis. 211-218.

Hoffman, Paul J. Test reliability and practice effects. 273-288.

Hollander, Myles. A nonparametric test for the two-sample problem. 395-404.

Isaacson, Robert L. Review of "Elizabeth Duffy, *Activation and Behavior*." 311-312.

Johnson, Richard M. On a theorem stated by Eckart and Young. 259-264.

Jones, Lyle V. Beyond Babbage. 315-332.

Kintsch, Walter. A response time model for choice behavior. 27-32.

Klinger, Eric (with S. E. Feldman). Short cut calculation of Fisher-Yates "exact test." 289-292.

Kraemer, Helena Chmura. Comments on parameter estimation for Restle's theory of cue learning. 185-188.

Kristof, Walter. Statistical inference about the error variance. 129-144.

Kristof, Walter. The statistical theory of stepped-up reliability coefficients when a test has been divided into several equivalent parts. 221-238.

Lindeman, Richard H. Review of "Quinn McNemar, *Psychological Statistics*." 312.

Lord, Frederic M. Biserial estimates of correlation. 81-86.

Melton, Richard S. Some remarks on failure to meet assumptions in discriminant analyses. 49-54.

Meredith, William. The prediction of averages. 239-258.

Messick, Samuel (with L. R Tucker). An individual differences model for multidimensional scaling. 333-368.

Moon, John W. A note on "Pattern variants on a square field." 93-96.

Morrison, H. William. Testable conditions for triads of paired comparison choices. 369-390.

Overall, John E. (with J. L. Porterfield). Powered vector method of factor analysis. 415-422.

Porterfield, James L. (with J. E. Overall). Powered vector method of factor analysis. 415-422.

Sitgreaves, Rosedith. Review of "G. Rasch, *Studies in Mathematical Psychology I. Probabilistic Models for Some Intelligence and Attainment Tests.*" 219-220.

Toda, Masanoa. Review of "Wendell R. Garner, *Uncertainty and Structure as Psychological Concepts.*" 293-310.

Tucker, Ledyard R (with S. Messick). An individual differences model for multidimensional scaling. 333-368.

Tupes, Ernest C. Correcting correlation coefficients for group heterogeneity when one variable is a dichotomy. 43-48.

Weitzman, R. A. A factor analytic method for investigating differences between groups of individual learning curves. 69-80.

Woodbury, Max A. The stochastic model of mental testing theory and an application. 391-394.

Zinnes, Joseph L. Review of "K. J. Arrow, Samuel Karlin, and Patrick Suppes, *Mathematical Methods in the Social Sciences.*" 313-314.
